

MEMORANDUM

Russia, St. Petersburg

November 21, 2015

About international cooperation of non-profit associations of Manufacturers and Entrepreneurs

It is evident that in the current unstable economic and political situation the responsibility of all participants of business processes is increasing.

Non-profit alliances of manufacturers and entrepreneurs, generally operating in the form of associations and unions, should and are able to contribute to solving current problems. Therefore, it is necessary to encourage in every possible way initiatives of the above-mentioned non-profit associations, aimed at the development of international business cooperation in the interests of their members and partners.

Development of this international cooperation is due to active use of modern communication resources, one of which is Internet forum "World of NPOs."

Participation in the Forum creates conditions and prerequisites for a direct dialogue between representatives of both non-profit associations and their members and business partners: this dialogue is the best way to achieve mutual understanding and effective cooperation.

This Memorandum welcomes all the interested organizations and people to join.
